Data security is big news—everyday we read stories of ransomware and phishing attacks on businesses of all sizes. It is no longer a case of if but **when** you will suffer an attack.

With this growing level of inevitability, it is vital to ensure you don't make life easy for malicious attackers. In addition to protecting your business from cyber attacks, you must also ensure you detect breaches, prevent the spread of any damage and remediate it swiftly.

Espria can help you achieve this.

Espria has a broad range of solutions and services that have been designed to mitigate common cyber security threats and vulnerabilities. We also have the experts that know how to do this!

Overview of Service

Security cannot be a 'tick-box' exercise - it requires regular and on-going maintenance that can be costly for organisations to manage.

Espria offer a range of Cyber Security Managed Services to help you We perform the leg work required to maintain the security of your systems, giving you peace of mind and allowing you to concentrate on your core business.

Business Value

Since the introduction of the EU General Data Protection Regulation (GDPR), it has never been more important to ensure the security of your data. This requirement will only increase over time.

Organisations that handle Personally Identifiable Information (PII) must demonstrate that they take security seriously by keeping systems up to date and putting in place tools and processes that mitigate the impact of a breach.

Additional Services

Espria has a range of solutions and services that follow the proven industry model of Predict, Prevent, Detect and Respond.

- Discover vulnerabilities in your systems and remediate them, before they are exploited by someone else (predict).
- Significantly reduce the risk of damage from cyber attacks (prevent).
- Monitor applications, systems, and networks for intrusions and suspicious behaviour (detect).
- Recover systems and data; perform forensic analysis and bounce back stronger (respond).

In addition to IT security solutions and services, Espria can help your organisation to attain and maintain Cyber Essentials, ISO27001 and GDPR compliance.

Summary

Espria has long standing relationships with security vendors including DarkTrace, Menlo, Mimecast and Sophos; as well as solutions providers including Citrix, Ivanti and Microsoft. Contact Espria to see how we can help you to prevent attacks and protect against data theft.

For over 25 years Espria, has been making business processes simple, by providing bespoke managed IT business solutions to clients throughout the UK. With a focus on delivering outstanding service, we constantly evolve our customers' future-proofed solutions to empower their businesses with technology to support and enable digital transformation.
